

Open your web browser, preferably Internet Explorer, and navigate to <http://extranet.visionxusa.com>

Read any applicable notes or details, and then click Sign In on the left Side. You will then arrive at the Extranet.

Click on Product Pictures – Tiffs on the quick launch links on the left side of the page, under the Marketing Media Heading.

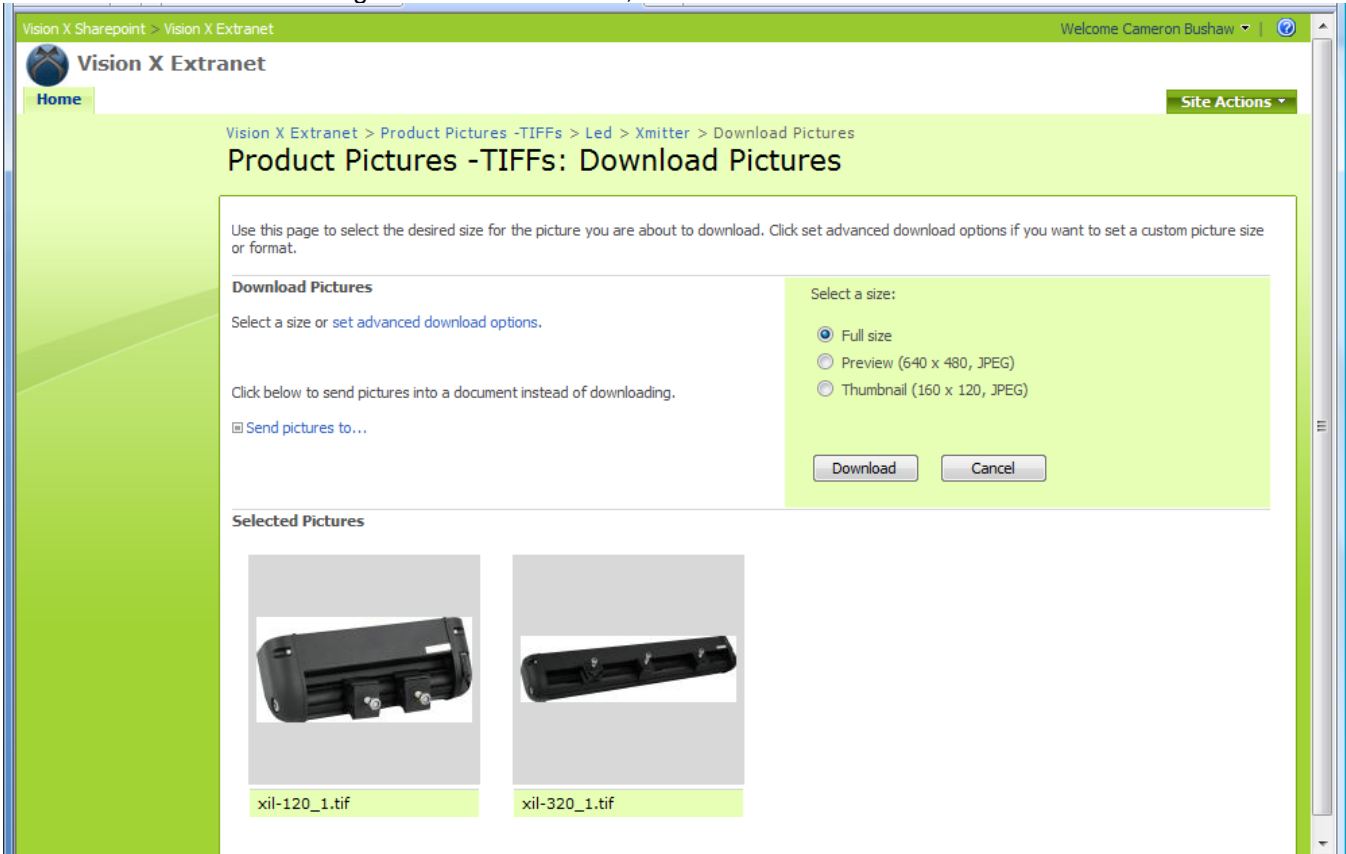

Click on a product category, and the product family. You should then see a group of thumbnails of the product pictures.

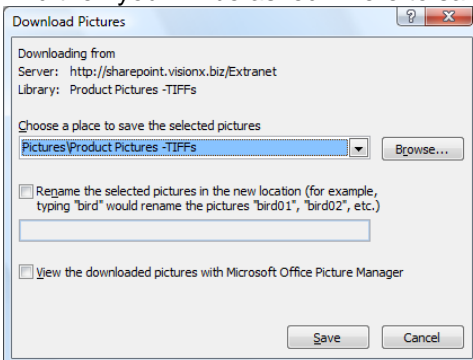

If you want to download a single image click on the thumbnail, but if you would like to download several images click on the check boxes, and select Actions > Download.

You will then be presented with options for downloading the images.

If you leave the option at Full size, the large Tiff images will download to your computer, but if you select Preview of Thumbnail you they will be saved as Jpeg files. Then click download, a security message may appear, asking if Microsoft Office Picture Manager can access the site, click Allow.

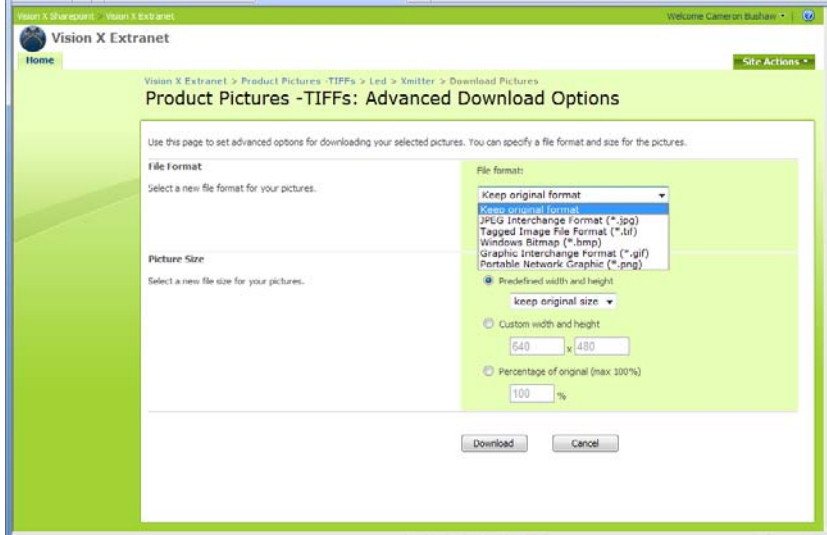

And then you will be asked where to save the pictures.

You have the option to use Microsoft Office Picture Manager to view the download.

If you would like the full resolution image in an alternate format, after selecting which images to download, again select Actions > Download. On the download page click on set advanced download options.

You will be presented with an increased set of options including, file format and size.

Once you have selected the options you want, click download. Allow Picture Manager is prompted, and then select a download location.

Want to select pictures from throughout the site, not just one product category? You can, your selections will remain even as you navigate through the Product Pictures.

Want to see which Product Pictures you have selected? Click on the arrow next to View: All Pictures, and in the drop down menu select Selected Picture.

Any questions or problems; or if you would like an image CD or download link with the entire image catalog; just e-mail Cameron@visionxusa.com.
